Classroom Activity 4

START PROGRAM: adds/multiplies two numbers

    DECLARE
      num1, num2, result_add, result_mul
    PRONT("Enter number1 and number2")
   **GET** num1, num2
    result_add = num1 + num2
    result_mul = num1 + num2
    PRINT("This is the result: ", result_add)
    PRINT("This is the result: ", result_mul)

END PROGRAM

Start

Define num1, num2

get num1, num2

add = num1+num2

mul= num1*num2

print Mul, Add

Terminador

Draw a flowchart and write its pseudocode that adds/multiplies two numbers given by the user.
